

6. jQuery Tab Drop for Bootstrap Plug-in

The built-in tab user interface elements of Bootstrap are versatile and useful for organizing content in a user-selectable system. However, the responsive nature of the Web and devices sometimes introduces challenges to using the tabbed UI of Bootstrap, especially when more tabs exist than will fit on the device's screen. The jQuery Tab Drop for Bootstrap plug-in is a targeted solution to make the tabs behave responsively, with the aid of a dynamically-generated drop-down to hold all tab choices that cannot fit rendered as tabs on the current display.

You can access the project page for the Tab Drop for Bootstrap plug-in at <http://www.eyecon.ro/bootstrap-tabdrop> (<http://www.eyecon.ro/bootstrap-tabdrop>).

This example demonstrates how to create a set of tabs that utilize the plug-in.

```
<!DOCTYPE html>
<head>
  <title>Bootstrap Rating Example</title>
  <!-- load jquery library from cdn -->
  <script src="https://ajax.googleapis.com/ajax/libs/jquery/1.11.3/jquery.min.js"></script>
  <!-- load bootstrap js from cdn -->
  <script src="https://netdna.bootstrapcdn.com/bootstrap/3.3.6/js/bootstrap.min.js"></script>
  <!-- load bootstrap css from cdn -->
  <link rel="stylesheet" href="https://netdna.bootstrapcdn.com/bootstrap/3.3.6/css/bootstrap.min.css">

  <!-- load plugin js file -->
  <script src="bootstrap-tabdrop.js"></script>
</head>
<body>
  <div class="container">
    <div class="row">
      <div class="md-col-12">
        <ul class="nav nav-tabs">
          <li class="active"><a href="#tab1" data-toggle="tab">Section 1</a></li>
          <li><a href="#tab2" data-toggle="tab">Section 2</a></li>
          <li><a href="#tab3" data-toggle="tab">Section 3</a></li>
          <li><a href="#tab4" data-toggle="tab">Section 4</a></li>
          <li><a href="#tab5" data-toggle="tab">Section 5</a></li>
          <li><a href="#tab6" data-toggle="tab">Section 6</a></li>
          <li><a href="#tab7" data-toggle="tab">Section 7</a></li>
          <li><a href="#tab8" data-toggle="tab">Section 8</a></li>
          <li><a href="#tab9" data-toggle="tab">Section 9</a></li>
        </ul>
        <div class="tab-content">
          <div class="tab-pane active" id="tab1">
            <p>Section 1.</p>
          </div>
          <div class="tab-pane" id="tab2">
            <p>Section 2.</p>
          </div>
        </div>
      </div>
    </div>
  </div>
```

```
</div>
<div class="tab-pane" id="tab3">
  <p>Section 3.</p>
</div>
<div class="tab-pane" id="tab4">
  <p>Section 4.</p>
</div>
<div class="tab-pane" id="tab5">
  <p>Section 5.</p>
</div>
<div class="tab-pane" id="tab6">
  <p>Section 6.</p>
</div>
<div class="tab-pane" id="tab7">
  <p>Section 7.</p>
</div>
<div class="tab-pane" id="tab8">
  <p>Section 8.</p>
</div>
<div class="tab-pane" id="tab9">
  <p>Section 9.</p>
</div>
</div>
</div>
</div>
<!-- custom script to activate tab drop plug-in on all tabs and pills (if you have any) -->
<script>
  $($('.nav-pills, .nav-tabs').tabdrop());
</script>
</body>
</html>
```
