

# Assignment - Week 1 - Fall 2016

---

**Due** Monday by 3:59pm      **Points** 40      **Submitting** a file upload      **File Types** zip, jpg, png, and pdf

---

## Description

Make two HTML pages. Make the pages different colors with CSS in an external style sheet, give them each a unique title, and link the two pages using the <a> tag. You should know this tag from your previous courses or experience. If you do not, look it up now! Upload your pages to your web server space as described earlier in this module.

Validate your HTML pages using the W3C validator (<http://validator.w3.org/> [.http://validator.w3.org/](http://validator.w3.org/)). Make a screenshot of the validation confirmation of one of your pages.

## Purpose

- Make very basic, functioning webpages.
- Practice linking pages.
- Gain practical experience using FTP.
- Practice validating pages.

## Tools

- Text editor
- Chrome browser with Chrome developer tools
- FTP client
- W3C Validator

## Due Date

This assignment is due by the end of this module.

## Submission Directions

1. Put your files in a folder.
2. Name your folder "module1\_YOURLASTNAME."
3. Upload your folder to your server space.
4. ZIP the local copy of your folder.
5. Post the ZIP file of your folder, the screenshot of the validation confirmation screen, and a URL where your files can be viewed on the Internet. Use the following naming conventions:  
*module1\_YOURLASTNAME\_2HTMLPages.zip*  
*module1\_YOURLASTNAME\_Validation.jpg*
