

7. Configuring the Navigation Menu in Your WordPress Site

Creating a Primary Menu

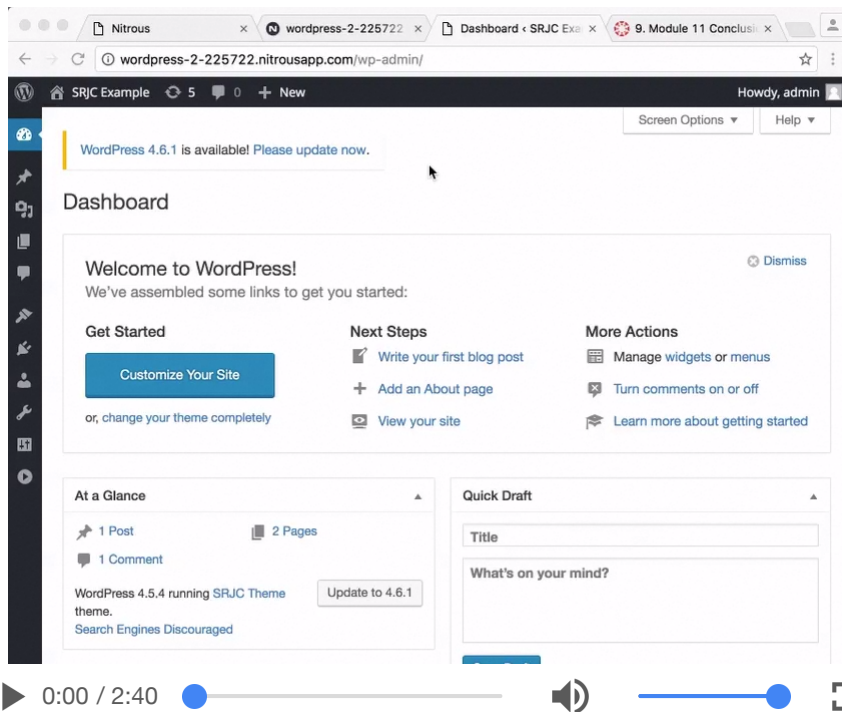

Follow the steps below in the Play by Play outline and watch the Video Screencast for a complete walk through to create your site's primary menu and add links to posts and pages. Your site's custom theme includes open source code to dynamically render the correct HTML markup for a responsive Bootstrap navigation menu.

Play by Play

1. Login (if needed) to your WordPress site using your site's username and password.
2. Navigate to the WordPress administrative dashboard.
3. Hover over the Appearance menu item in the left sidebar of the dashboard.
4. Click on the Menus link in the Appearance drop-down menu.
5. Create menu and make it the theme's primary menu.
6. Add links to the menu.
7. Save the changes to the menu.
8. View your WordPress-powered site's home page.
9. Notice that our WordPress theme includes custom PHP code to create HTML for collapsible and responsive Bootstrap navigation menu.

Video Screencast

This video screencast demonstrates the Play by Play steps above in order to create a primary menu for the site and add links to the menu.
